Parenting can be extremely challenging in today’s fast-paced, technology driven society. Children of this generation are growing up in what we call the digital era, an era of information overload while parents are trying to keep their children rooted.

Values Plus aims at collaborating with parents to create an environment for all round development of the child. Our goal is to bring value education in schools to a full circle by engaging parents and thus empowering students.

Values are the principles on which people base their behaviour. Values Plus brings to you an interactive workshop, to help parents get an insight into the traits they want their children to exhibit and how they can help their children imbibe good values.

We invite parents to join us for this lively discussion held in New Horizon Gurukul Auditorium that will include:

- Presentations
- Interactive activities
- Opportunities to share with other parents your parenting stories

The workshops will be presented by trained and experienced counsellors, who speak from their experience in dealing with children and give you simple tips that you can practice with your children.
